

Sazzad M Rahman

Web Developer

I am a Computer Science & Engineering student who is currently in the learning phase of web development. I am passionate about technology and continuously working to improve my skills in building modern and user-friendly web applications.

I enjoy learning how websites and web applications work, from frontend design to backend logic and database integration. Through consistent practice and personal projects, I am developing my understanding of web development, problem-solving, and software engineering fundamentals.

My goal is to become a skilled web developer in the future by continuously learning, building projects, and improving my technical abilities step by step.

Address

Sector-4, Uttara, Dhaka-1230

Education

2023 - 2027

B.Sc. in Computer Science & Engineering (Running)

University of Information Technology and Sciences (UITS)

2019 - 2021

Hsc - Milestone College

2017 - 2019

Ssc - Milestone School And College

Skills

- HTML
- CSS
- JS
- Node JS
- MySQL
- Figma
- Canva
- PHP
- XAMPP
- Vs Code
- Excel
- MS Word

Experience

Blood Management System – “Ami Donor”

Type: Full Stack Learning Project

Developed a blood management platform focused on helping users find blood donors during emergency situations. This project was built as part of learning practical full-stack application development and solving real-world problems through technology.

Key Learning & Development Areas:

- Built donor registration and profile management systems.
- Implemented blood-group-based searching and filtering features.
- Practiced backend integration using Node.js and MySQL.
- Worked on emergency request handling systems.
- Learned location-based data management concepts.
- Developed admin dashboard functionality for management purposes.
- Improved understanding of database-driven web applications.

Technologies Used:

HTML5, CSS3, JavaScript, Node.js, MySQL

E-Commerce Platform

Type: Full Stack Learning Project

Developed a full-featured e-commerce platform as part of practical learning and development experience. The project helped improve understanding of frontend design, backend logic, database integration, and user authentication systems.

Key Learning & Development Areas:

- Created responsive frontend pages using HTML5, CSS3, and JavaScript.
- Learned backend functionality development using PHP and MySQL.
- Implemented user registration and login systems.
- Built shopping cart and product management features.
- Practiced database handling.
- Worked on admin dashboard functionality and order management concepts.
- Improved understanding of real-world e-commerce workflows.

Technologies Used:

HTML5, CSS3, JavaScript, PHP, MySQL

Hobbies

- Coding
- Gaming
- Designing
- Technology
- Football

Language

English

Bangla

Hindi

Portfolio Website

Type: Frontend Development & UI/UX Practice Project

Designed and developed a modern personal portfolio website to practice responsive design, animations, and interactive user experiences.

Key Learning & Development Areas:

- Practiced responsive web design for different screen sizes.
- Implemented animated UI effects and smooth scrolling interactions.
- Worked with JavaScript-based animations and typing effects.
- Developed custom cursor and hover interaction systems.
- Improved frontend design and user experience skills.
- Explored futuristic and modern web interface design concepts.

Technologies Used:

HTML5, CSS3, JavaScript

Career Objective

My career objective is to become a skilled and professional web developer through continuous learning, practice, and real-world project experience. As a Computer Science & Engineering student currently in the learning phase, I am focused on building a strong foundation in both frontend and backend web development, along with essential software engineering principles.
